WE'RE YOUR
IDEA CREATORS

Creating Ideas

Committed
Pioneering
Dynamic
Successful
Fast

To us, this means taking on your complex problems with loads of creativity and enthusiasm.

That's why we're continually testing new technologies in in-depth research and development projects. To this end, we have a unique range of innovative production processes at our disposal - processes which enable the creation of individual solutions which are well thought out down to the smallest detail and which make it possible for us to continuously create ideas for your success thanks to their economic efficiency and outstanding quality.

Mould Making

Mould production

Project services

Service and support

Sampling

With our innovative technologies, we offer high-performance moulds which ensure maximum productivity thanks to the shortest possible cycle times and long service life.

You'll be accompanied by a direct contact partner for the entire duration of the project, from the design phase to automated production and ongoing quality assurance to assembly and initial serial production.

Cooperation begins before the actual start of the project so as to offer you the best possible ideas for your injection moulding tool based on your individual requirements and needs.

Machine Engineering

Serial machine manufacturing

Special machine engineering

Depth of production

Project services

When it comes to serial machine manufacturing, we offer economical solutions for everything from single modules to entire machines, all from a single source.

Even highly specialised requests are no problem - our special machine engineering provides you with one-off productions perfectly tailored to your individual needs.

Of course, our highly qualified personnel also accompanies you with innovative ideas for the entire duration of the project and beyond.

Research & Development

3D printing

Conformal cooling

Research projects

Network and partners

Thanks to our in-depth research and development work embedded in an international network of renowned partners in industry and science, you'll secure continuous competitive advantages through the use of innovative technologies.

Your advantage: You'll benefit from solutions and innovative optimisation potential which already fulfil the requirements of tomorrow, today.

Why Hofmann?

Individual

No two problems are the same. This is why we only provide solutions individually tailored to your specific requirement profile.

Economical

As an economically strong partner with nearly 60 years of experience, we offer state-of-the-art production processes with a high capacity for utmost adherence to deadlines.

Innovative

Thanks to our in-depth research and development work, you're able to secure future-oriented solutions for today which others won't benefit from until tomorrow.

Reliable

With comprehensive simulation processes and detailed feasibility studies, we ensure that you can rely on our solutions.

Fast

High production capacity, a variety of different technologies and the wealth of experience of our employees make record-breaking response times possible on our end.
